PROFILE

I'm a Mobile App Developer with experience in Kotlin and Flutter. I also practice web / app penetration testing. I'm currently transitioning into Red Teaming and Vulnerability Research.

EXPERIENCE

Penetration Tester • Internship

Feb 2026 - May 2026

Cyber Alert Nepal, Remote (Part time)

- Conducted vulnerability assessments and penetration testing on web applications and network infrastructure.
- Generated various cyber security reports.

Cyber Security Global Intern • Internship

June 2025

Clifford Chance (via Forage), Virtual

- Simulated a response to an ICO Dawn Raid, demonstrating an understanding of regulatory compliance and data protection protocols.
- Analyzed legal liabilities following a high-scale data leak and formulated strategic mitigation steps.
- Drafted technical and legal responses to data-related damages claims, balancing corporate risk with data privacy laws.

Cyber Security Intern • Internship

Jan 2024 - Apr 2024

Prodigy Infotech, Virtual

Developed Python programs for encrypting messages (Caesar cipher), image encryption, password strength assessment, a keylogger, and a packet sniffer for network traffic analysis.

EDUCATION

Bachelor of Engineering (B.E), Computer Engineering

May 2023
(ongoing)

TU IOE, Purwanchal Campus - Dharan

PROJECTS

[SureSky \(Android\)](#) ↗

Nov 2025

Engineered a streamlined weather dashboard utilizing WeatherAPI to fetch and display real-time environmental data. Focused on efficient state management to handle loading, error, and success states within a single-screen interface, styled with Material 3 and Jetpack Compose.

[WorldTime \(Flutter\)](#) ↗

Aug 2025

Developed a multi-screen time tracking application that fetches real-time data from the World Time API. Implemented Named Routes for seamless navigation between location selection and dashboard views, and utilized the http package with async/await for efficient JSON parsing and error handling during API calls.

[Quiz App \(Android\)](#) ↗

Aug 2025

Developed an interactive Kotlin-based quiz engine featuring real-time score tracking and dynamic feedback. Optimized the user experience by handling system gestures and custom exit-confirmation dialogs, while managing complex application states to ensure data persistence during the quiz lifecycle.

[Task Manager App \(Flutter\)](#) ↗

Jan 2026

Built a sleek, content-focused application to master Jetpack Compose and declarative UI patterns. Implemented Compose Navigation for seamless transitions between quote feeds and detail views, focusing on state-driven UI updates and high-performance list rendering.

[Lingo Breeze \(Flutter\) ↗](#)

June 2026

A language-learning companion app built with Flutter that lets you save, organize, and review custom vocabulary cards. It uses a Node.js backend with Firestore for real-time sync and features pull-to-refresh, instant state updates with Riverpod, and a clean Material 3 interface.

[Pip's Pages \(Flutter\) ↗](#)

June 2026

A gamified, interactive storytelling and quiz app for kids built with Flutter. It features a narrator that reads stories aloud using text-to-speech (TTS) and dynamically renders quizzes from backend-driven JSON. The app demonstrates robust asynchronous state management and data-driven UI rendering.

SKILLS

Mobile Development

- Native Android: Kotlin, Jetpack Compose, MVVM Architecture, Dagger-Hilt, Coroutines & Flow.
- Cross-Platform: Flutter & Dart, REST API Integration, State Management, Navigation.
- Tools: Android Studio, VS Code, Git/GitHub, Gradle (Kotlin DSL), Supabase.

Cybersecurity & GRC

- Offensive Security: Vulnerability Assessment & Penetration Testing (VAPT), OWASP Top 10.
- Defensive Security: Endpoint Protection (IDS/IPS, Anti-Malware), System Hardening.
- Compliance: Data Privacy Regulations, Risk Mitigation (Clifford Chance Virtual Internship).

Databases & Systems

- Databases: PostgreSQL (Relational Modeling, SQL Optimization).
- Systems & Scripting: Linux SysAdmin, Bash/Zsh, PowerShell.
- Networking: TCP/IP, OSI Model, Network Protocols & Topologies.

Core Programming

- Languages: C/C++, Python, JavaScript, Kotlin, Dart, HTML/CSS.
